My mother was great at instilling in me adventure and imagination as a child.

I would picture I was a part of Robin Hood's gang, Ivanhoe, or Indiana Jones.

When I got older, I became fascinated with proper adventures of those who had gone inside the deepest, darkest jungles and followed the longest rivers, circumnavigated the planet, found their way to the North and South Poles, and made it to the moon. Eventually, I came to the realization that I was born a little too late. I couldn't be the first to climb Mount Everest, for example that milestone was already reached in 1953. It felt like all the great "firsts" had already been claimed. For a moment, I felt a little disheartened, as if there was nothing left for the rest of us to discover. Then, in 2013, my dad sent me an email about extreme travelers.

I had no idea this was possible.

I thought it would take a lifetime, and you'd have to be a millionaire.

Back then, about 200 people had already done this, and some were in their 20s, so that was quite inspiring.
